

Study Plan Lab#3
Intro to Computer Science

420-121-VA

Section: 00003

Jose Samayoa

Study Plan Lab#3

The point of this document is to give myself as well as my professor a chance to see what kind of deliverables I have over the course of this semester as well as for all my classes. This document will help me keep track of every assignment, test, anything that must be graded for me to plan ahead and to make sure I get them done in time. This document is serving as a timetable just as much as a time management exercise. This will guide me for the coming future and hopefully reduce an amount of stress that comes with these assignments trying to get ahead of time.

- Intro to Computer Science
- Game Programming 1
- Programming 1
- Fitness and Health
- Humanities (Sports and Society)
- Math Concepts
